

PRESTO-TAP®
Leak Detection System
Ambient Temperature Gauge

Model # 6800 - Presto-Tap® 300PSIG Ambient Temperature Gauge with Quick Coupler

Designed to be carried by drivers and service personnel (via a "belt-loop holster", also included) to perform NFPA leak testing and determining "true" out-of-gas situations. This U.S. Patented 300PSIG Gauge reports tank pressure at appropriate ambient temperature and when compared to surrounding temperature readings (within a few degrees, considering atmospheric conditions) will indicate if liquid is present in the tank and if enough pressure is present to support the system.

United States Patents 5,787,916 & 5,992,438 & Other U.S. Patents Pending; and, Canadian Patent Applied For. Meets NFPA 54 and 58 Requirements.
