

PRESTO-TAP®
Leak Detection System
LDS 2000/TG (Test Gauge)

Model # LDS 2000/TG Test Gauge - Leak Detection System Test Unit (For Testing of Mobile Gauges)

Designed for the periodic testing of mobile gauges (Model # 6800) carried by drivers and service personnel. Daily testing is recommended.

Product shown is to be installed in an isolated testing environment attached to a cylinder or tank that does not provide service to appliances. Also, can be ordered with a F.POL where testing is to be performed in conjunction with an installation providing service to appliances. Ships with M.POL component.

A "Test Gauge Log Sheet" (documenting the periodic testing, for legal and internal procedure reasons) is available upon request.

Underwriters Laboratories (UL) Listed,
United States Patents 5,787,916 & 5,992,438 & Other U.S. Patents Pending; and,
Canadian Patent Applied For.
Meets NFPA 54 and 58 Requirements.
